AI Product Manager

SUMMARY

Product manager who builds and ships AI products hands-on. Co-founder and Head of Product at a startup (market research to MVP), solo builder of a live expat platform, and maker of working AI tools with Claude, n8n, and RAG.

EXPERIENCE

Yonma Yon, Co-founder / Head of Product (proptech/fintech, Tashkent)

Nov 2024 - 2025

- Owned product end to end: market research (**TAM/SAM/SOM**, PESTEL, competitors), customer discovery (**personas**, **JTBD**, **CJM**), and the MVP spec (Telegram bot with **KYC** and matching).
- Built the **B2B2C** business model: **unit economics (CAC/LTV)**, a 3-year financial model, a Top-10 risk matrix, channel GTM, and a 24-month roadmap.
- Took the product to **MVP**; demand in the Uzbek market did not validate, and we closed it.

Instameal, Co-founder / Product (food-tech)

Mar - Jul 2024

- Built a food-delivery aggregator from zero, starting in a student dorm: a Telegram bot with local suppliers, **week-ahead scheduled ordering**, and an invite-a-cook feature (from my sous-chef background).
- Validated the bot-first flow with an **A/B test**; built the MVP by vibe coding (bot + site), UX in Figma. **400+ users**.
- Led a small team (ops, marketing, accounting, merchandising). When campus rules blocked B2B expansion, I adapted and **sold the product** to a retail chain.

Molot / Lavka No.1, AI Automation (Freelance)

Jan - May 2026

- Built AI and no-code solutions for a stadium food point and a retail chain: a Telegram WebApp for **QR pre-orders** (SBP pay), AI clearance of evening leftovers via **iiko POS** integration, real-time POS **anti-fraud alerts** to Telegram, and AI review replies. Also managed floor staff.

Synergia University, Client Relations Coordinator

Aug 2023 - Apr 2025

- Client work: onboarding, specs for the delivery team, and contract oversight; embedded Claude and ChatGPT into client documentation.

IDF Lab (HSE University), Analyst / Project Lead

Jun 2023 - Nov 2024

- Led a project for the **Izhevsk and Perm city administrations**: logistics/routing design plus data analysis (RFM). Client rated it **8/10**.

PROJECTS

Expatriate Roadmap SEA - live

2026

- Run it as a product: **customer discovery**, **PRD**, **roadmap** (Notion). Built and deployed solo on **Next.js** + **Supabase**: visa/city map, guides, community, events, jobs; Telegram bot as the main channel.
- Live with early **organic traffic across 5+ countries** (Iraq, US, Belgium, Finland, Russia) via Google.

AI Career System - live

2026

- End-to-end job-search automation (**Claude API** + **n8n** + Sheets + Telegram): vacancy parsing, ATS resume adaptation, cover letter in **under 80 seconds**. In daily personal use.

Mia, Dental Clinic RAG Assistant - demo

2026

- RAG assistant (**Python** + **Groq** + **Gradio**) that answers only from clinic documents, **no hallucinations**. Live demo on Hugging Face.

Portfolio + JasurGPT - live

2026

- Personal site with **JasurGPT** (OpenRouter), an AI chat trained on my resume and projects that answers recruiters 24/7.

SKILLS

Product: discovery, customer dev, JTBD, CJM, user stories, prioritization, A/B testing, MVP, unit economics (CAC/LTV), market sizing, roadmapping, Scrum

AI & Automation: Claude, ChatGPT, prompt engineering, RAG, n8n, Voiceflow, NotebookLM, Cursor, AI agents

Dev (vibe coding) & Tools: Next.js, React, TypeScript, Supabase, Vercel, Git; Google Sheets, Figma, Telegram Bot API, Whisper

CONTENT

- @pmvision_ai** Telegram channel on AI, product, and the job search. **Top-3** on vc.ru (PM vision AI blog); Dzen **67% read-through**; Threads **~15,000 views/thread**.

EDUCATION

- HSE University**, Moscow: Business & Economics, International Program (**did not finish**, 2025). Courses: AI for PM (DeepLearning.AI), CJM & CustDev (ProductStar), Metrics & Models (Shelf).
